

ITIL® Foundation Training Certification

Delivery Method: Classroom

Duration: 2 Days

What you will learn

ITIL certifications are recognized internationally across industries and regardless of the size of the organization. The ITIL qualification is owned by carries the prestige of the “British Home Office.” This two-day intensive course provides delegates with comprehensive training to prepare them for the ITIL examination (based on “The ITIL Foundation Certificate in IT Service Management Syllabus,” latest edition).

It will enable delegates to:

- Understand all the elements of the ITIL syllabus
- Understand the specific examination language
- Learn strategies and techniques for mastering the examination

Students will learn how to:

- Explain the context of IT Service Management
- Plan improvements
- Execute improvement plans and strategy
- Demonstrate the use of various ITIL techniques and processes
- Define a new service and its use throughout the Service Lifecycle
- Design services’ management processes, matrices and organizational governance
- Understand the value of communication, documentation and automation
- Understand the examination guidelines
- Please note that the cost of the ITIL exam is included with this course. Our Back office support team will be able to assist you should you have any questions.

Examination Guidelines

Examination structure: questions from all chapters, testing both understanding as well as memory

Question structure: multiple choice

Extensive examination practice and feedback is included in the workshop.

Participants will be requested to take the ITIL examination at around 4:00 p.m. on the final day of the course. The examination consists of:

- 40 compulsory questions; No negative marking
- One hour

Audience Profile

This course is designed for IT Professionals, IT Support Staff, project managers, project management consultants and aspiring project managers. It is also relevant to other key staff involved in the design, development and delivery of services.

This course is for any proactive IT professional willing to stand out from his or her peers by upgrading skills and credentials, and gaining knowledge of best practices in Service Management.

Any prior IT experience will be helpful.

Prerequisites

Ideally delegates will have some experience working in an ITSM environment and have a basic understanding of ITSM issues, although no prior IT experience is required by the Official ITIL Accreditor.

Delegates will be provided with pre-course reading material by email on receipt of payment prior to attending the course. Student success in this intensive 2-day course will be enhanced by paying close attention to the pre-reading materials.
